DETAILED ACTION

Request for Continued Examination

1. The request for continued examination (RCE) under 37 C.F.R. §1.114 is acceptable. An action on the RCE follows.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

3. Claims 28-50 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In at least claims 1, 43, 44, 50, the selective formats of various groups, “selected from A, B, C,..., and X”, are improper in that it is not clear whether the individual members in the group are selected in alternatives only or in both alternatives and combinations. In general, when the members of in the group are individually chosen as alternatives, the format, “selected from A, B,..., or X” or “selected from the group consisting of A, B,..., and X”, should be used; and when the members in the group are chosen both in alternatives and combinations, the format “selected from the group consisting of A, B,..., X, and mixtures thereof” should be used. See MPEP 2173.05 (h).

Applicants are requested to amend the selective formats of the instant claims according to the above guidance.

Double Patenting

4. Claims 28-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 and 11-17 of U.S. Patent No. 5,849,653. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the catalyst compositions overlaps with that of the claims of the patent. In claim 11 of the Patent, component (A) of the Patent overlaps with component (A) of the instant claims when A of formula (I) of the instant claims has the same meaning as Cp, and component (B) of the Patent overlaps with component (B) of the instant claims when w=3 or 2 and z=0 or 1 respectively and (CH₂-CR⁴R⁵R⁶) is (CH₂-CHCH₃Ph) (2-phenylpropyl of col. 5, lines 23-24) in the formula of (II) of the Patent. For example, the tris(2-phenylpropyl)aluminum and bis(2-phenylpropyl)aluminum hydride meet the limitations of component (B) of the instant claims.

5. Claims 28-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 and 9 of U.S. Patent No. 6,136,932. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of the catalyst composition of the instant claims overlaps with those of the claims of the patent for the similar analysis as shown above.

Claim Rejections - 35 USC § 103

6. Claims 28-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dall'Occo et al. (US 6,136,932 and US 5,849,653 respectively).

Art Unit: 1713

Dall'Occo's teaching is relied upon as shown above.

Therefore, it would have been obvious to a skilled artisan at the time the invention was made to employ Dall'Occo's teaching to provide a catalyst composition comprising a metallocene catalyst and a cocatalyst such as tris(2-phenylpropyl) aluminum and bis(2-phenylpropyl)aluminum hydride because such is within the generic disclosure of the reference and all of the embodiments of the reference are expected to work and in the absence of any showing of criticality and unexpected results.

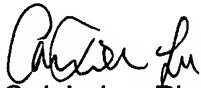

Response to Arguments

7. Applicant's arguments with respect to the rejections of the record have been considered but are moot in view of the new ground(s) of rejection.
